Art Unit: 1722

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Hendry.

Hendry discloses a mold device comprising a bottoming portion on a parting surface having vacant spaces 27 and 28 which are vented.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by either Hatakeyama et al. or Atake.

Both of the above references disclose a mold device having a bottoming portion on a parting surface each having a vacant space 32 and space holding member 32 respectively.

Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Hultgren.

Hultgren discloses a mold base 10 and 11, a slide core 44 provided in said mold base, a slide cavity block 22 provided in said slide core, and guide rails 16 and 41 and a central rail 25 for guiding said slide core.

Claims 3 and 5 are allowable over the prior art since the prior art fails to disclose or suggest a mold base, a slide core and a slide cavity block being separately thermally controlled.

Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base

claim and any intervening claims. Claim 6 defines over the prior art since the prior art fails to disclose or suggest heating and cooling channels in the slide cavity block as set forth in said claim.
